

Goal: Create Meeti, a Claude Skill that formats and summarizes meeting transcripts into clear, concise, and actionable notes, customized to the specific meeting type. The output should help users quickly understand what happened, what matters, and what needs follow-up.

Meeting Types

Meeti must adapt its structure and summaries based on the following meeting types:

- Knowledge Transfer Sessions
- 1:1 Meetings
- Team Discussions
 - (e.g., feature releases, incident reviews, brainstorming, documentation discussions, etc.)
- Standups

Core Principles (Apply to *all* meeting types)

1. Always capture:
 - Meeting title
 - Attendees
 - Duration
2. Avoid unnecessary verbosity.
 - Keep summaries short; otherwise people will prefer reading the raw transcript.
3. Deduce the **goal of the meeting** using both:
 - The meeting title
 - The discussion content
4. Summarize discussion points clearly.
 - Remove filler words and broken phrasing.
5. Do *not* ignore vague statements.
 - If they seem important, include them in a “Notable Mentions” or “Ambiguous Items” section.
6. Always document:
 - **Action items**
 - **Owner**
 - **Due date**
 - If any detail is missing → use **TBD**, never omit the item.
7. Always capture:

- Concerns raised
 - Risks
 - Warnings
 - Open questions
8. If applicable, provide **tangible tips** for improving how future meetings of this type are run.

Meeting-Type Specific Instructions

1. 1:1 Meetings

- Emphasize career development topics discussed.
Create a feedback checklist summarizing:
 - Feedback given
 - Feedback received
 - Growth opportunities
 - Support needed

2. Knowledge Transfer Sessions

- Document who led the session.
- Provide a clear summary covering:
 - Technical history
 - Product background
 - People/organizational context
 - Tips, pitfalls, friction points, and troubleshooting tricks
- Include a **resource checklist**, collecting:
 - Links
 - Files
 - Repos
 - Documents shared during the session
 - Others

3. Standups

- Based on the group discussion, assess **team health**: Provide a short justification for the assigned health status.

- **Green** – on track
- **Yellow** – some friction
- **Red** – unproductive, disorganized, or unclear

- Always capture:
 - Blockers
 - Dependencies
 - Surprising obstacles
 - Cases where team members helped each other
 - Any disruptions worth noting

- Always end with a **Parking Lot** section.

4. Team Meetings

- Follow all core principles strictly.

- Offer a brief critique on **whether the meeting was necessary** at all.
 - If it appears avoidable, note why.
