

1 1 Sofia Maria

Title: Sofia & Maria: Q2 Performance and Growth Strategy Participants: Sofia (Manager), Maria (Report)

Duration: 60 minutes

(Transcript Start)

Sofia: "Maria, we're doing a deeper dive this week. First, the positive: your technical output on the Q2 fraud detection project was outstanding. We saw a 15% reduction in false positives directly tied to your logic. I did, however, note that your cross-functional presentation to the Sales team lacked some clarity; they seemed confused about the technical trade-offs we made. That's a key area for your progression. Speaking of which, you've mentioned wanting that Senior Engineer promotion within the next year. To get there, you need to gain visibility outside the immediate team and start mentoring. Specifically, the new intern starting next month will report to you for their technical mentorship."

Maria: "Thank you for the detailed feedback. I agree on the presentation skills; I get too focused on the code details. I'll make sure to practice the 'business case first' approach. I'm excited about the Senior Engineer goal. I feel like I'm hitting a wall with my current understanding of infrastructure-as-code. I'm dependent on the Infra team for every deployment script, and I need to fix that. Is there a way for me to get dedicated training time or a budget for a specialized course? I also think it would be great if I could lead the upcoming integration with the new payment processor—it's a high-visibility project."

Sofia: "The payment processor project is definitely high-visibility. I can assign you the technical lead role. Regarding the infrastructure knowledge, I'll approve the advanced Terraform course budget today, but you must start documenting the deployment process for your current service first; that's an action item for next week. I also remember Alex mentioned last week that they were considering moving us to a new project structure, which might affect your long-term goals, but it's vague right now. Just keep it in the back of your mind. Is there anything else you need from me to feel supported?"

Maria: "Not right now. Just access to that Terraform course. I'll send you the deployment documentation draft by Thursday."

Sofia: "Excellent. And remember, that mentoring starts soon. Don't forget to prepare a short welcome deck for the intern."
