

Standup Meeting

Title: Morning Sync - Feature X Participants: Liam, Chloe, Ben, Zara (Facilitator) Duration: 18 minutes

(Transcript Start)

Zara: "Morning, focus on blockers. Liam?"

Liam: "Finished my component, ready for review. I'm now starting on the integration tests. But honestly, this feature scope is a mess. Are we doing the multi-select dropdown or not? I heard two different things from two different people yesterday."

Chloe: "I'm still blocked by the database schema change Ben was supposed to finish two days ago. I literally cannot proceed on the data layer until that's done. I'm going to work on documentation, which is low priority, just to stay busy."

Ben: "Look, I got pulled into the production incident yesterday morning. I haven't had a chance to finish the schema. It should be done by lunchtime today, but I'll need Chloe to check my work before deployment."

Zara: "Ben, let's prioritize that schema. Chloe, Ben will be unblocked by 1 PM. Liam, we're not deciding on the multi-select now; we need to add that to the parking lot and loop in the PM. We're consistently running over time on these syncs."

Liam: "Fine."
